

Metabolizer Plus (Weight Management System)
 (U.S. product)
 Article No. 2278 (60 caplets)

Metabolizer Plus can help to:

- Increase metabolism*
- Promote fat-burning, a process called thermogenesis*
- Enhance energy levels*

Rev up your metabolic rate for optimum safe weight control! All-natural Metabolizer Plus, part of Watkins Weight Management System, aids in the metabolism of fats and carbohydrates, helping reduce body fat and enhancing your energy level.* (Lower doses can be taken by those who want more energy without weight control.)

Why Watkins?

- **Chromium:** helps to promote fat loss while maintaining lean muscle in overweight individuals. Our Chelavite® form of chromium is better absorbed than other forms of chromium on the market.*
- **Country mallow leaf:** helps to increase the metabolic rate and stimulate the burning of fat tissue.*
- **Green tea:** promotes weight loss by increasing metabolism and helping to reduce absorption of fats and cholesterol; a naturally mild source of caffeine, it enhances the thermogenic effects of country mallow leaf.* Unlike other sources of caffeine found in some weight loss products, green tea acts as an antioxidant, protecting the body from the aging process.*
- And because an increase in the metabolic rate can place additional demand on the adrenal glands, our **Metabolic Support Blend** helps rejuvenate them to keep the body running at peak performance.*
- **Watkins Bio-Activator™ Blend (Black Pepper and Ginger):** Scientific studies strongly suggest that black pepper and ginger may help to protect and maximize the potency of vitamins and nutrients in the body.*

To enhance the effect of Metabolizer Plus, take it with Watkins Superfood Multiple. For maximum results, take it as part of a regimen including Reduce Plus, a sensible diet and exercise. Consult a physician before starting any weight loss program.

Warning: Not for use by individuals under the age of 18. Do not use if pregnant or nursing. Consult a physician or licensed qualified health care professional before using this product if you have, or have a family history of, heart disease, thyroid disease, diabetes, high blood pressure, recurrent headaches, depression or other psychiatric condition, glaucoma, difficulty in urinating, prostate enlargement, or seizure disorder, if you are using a MAO inhibitor or any prescription drug.
