

Menthol Camphor Ointment (U.S.)

Article No. 02358 (117 g/4-1/8 oz.)

Article No. 02359 (9 g/.3 oz. travel size)

Article No. 06630 (150 g/5.3 oz. upright tin)

A combination of menthol and camphor, skillfully compounded in a petrolatum base for convenient, effective use. Your stuffy head will love the penetrating aroma; provides temporary relief from muscular soreness and coughs caused by or associated with a cold.

- **Time-tested:** Since 1915!
- **Versatile:** Provides relief from bruises, sprains, sore muscles, and coughs associated with colds.
- **Non-staining petrolatum base:** Keeps skin from drying out; won't stain clothes.
- **Low-level anesthetic action:** Depresses pain perception, suppresses coughs.
- **Economical:** Costs less per ounce than Vicks® VapoRub®.
- **Pleasant, penetrating aroma:** Provides a feeling of comfort.

Active Ingredients

- **Menthol:** An alcohol extracted from cornmint oil. When applied to the skin, menthol produces an intense and lasting cooling sensation that counteracts pain and is also used as an antipruritic. It both stimulates the nerves for perception of cold and depresses those which transmit pain.
- **Camphor:** Occurs in nature in the camphor tree, an Asian evergreen related to cinnamon. When applied to the skin, camphor produces a mild local anesthetic action (depresses some nerve endings and stimulates others). It also acts as an antipruritic, which means it relieves itching.

Testimonial —

Individual results may vary.

"I had a terrible problem with toenail fungus; to the point where the nail was completely gone. I had tried everything I knew of and was unable to find an effective treatment, even after going to several doctors. I started rubbing Watkins Menthol Camphor Ointment on the affected area, and within weeks my nail grew back normally and the problem was gone."

— Robert Faison, Pennsylvania
